CADMATIC
SOFTWARE SOLUTIONS

CADMATIC is a design, engineering and information management software solution for engineering projects in the marine and process plant industries. By combining intelligent 3D modelling and advanced digital information management with an exceptional user experience, we provide the best products in the field. We help our customers to design, build and operate technologies for the safe production of energy, materials, food and pharmaceutical products, to transport people and cargo, to keep the world's waterways secure, and to have a good time on luxury yachts and cruise ships.

Web Application Developer, Summer / Part-time (Turku, Finland)

We are looking for a student for a summer job and possibly part-time job during studies.

We expect

- Some practical programming experience from either your studies or hobby projects.
- An interest to learn about web application development in either front-end, back-end or both.
- Our stack is Angular / .NET / MSSQL. Any experience with these or similar technologies is a plus.

We offer

- Interesting, real tasks – no toy projects.
- An opportunity to join a team of talented and enthusiastic professionals.
- A growing international organization with a relaxed atmosphere.
- Low level of bureaucracy - we keep our work agile and get things done.

Please apply online on our website www.cadmatic.com/careers and attach your **CV, motivation letter, transcript of records and code samples / GitHub links**.

For more information, contact mikko.yllikainen@cadmatic.com.

The deadline for applications is March 5th, 2019.
